

USE OF LOCOMOTIVES

Recently it has come to my attention that several locomotives have been kept out of service in order for them to be used "Outside the Fence" as it is called.

Several members have ask why do only a few members get to use certain locomotives and other don't get to use them at all.

This has lead to some discontent among some of the members, as they feel that other members get privileges that are not afforded to all members.

Therefore, if the WP 2001 can be used in the rental program, (to earn money) then why can it not be used to run the caboose train with out someone getting mad at another member just because it is being used.

Below are some experts from various Policies and Procedures that the FRRS has adopted.

I use these as reference for our discussion in this matter.

Perform their responsibilities for the benefit of the FRRS, it's customers, and members,
