

FEATHER RIVER RAIL SOCIETY – AGENDA REPORT

DATE: April 10, 2014

FROM: Director Vicknair and Director Carter

ITEM: New Business Item 1

SUBJECT: **Wrapping of “Silver Hostel”**

With the acquisition of the “Silver Plate” and the on-going litigation concerning the “Silver Hostel” work on the Hostel has been on hiatus and all efforts have focused on the Plate and 805-A.

With a need for space in the Diesel Shop, it is proposed that the Hostel be given a protective plastic wrap so that it can be stored outside. Specifications are as follows:

Proposal is for Fast Wraps Reno to do a low density polyethylene #4 wrap on the Hostel with zippered side access doors, UVI resistant, wrapped completely with dome, and down to the side sills and ratchet strapped to the underframe, making the car mobile when wrapped (company said you could put car on Amtrak after wrapping and it won't come off). Total cost will be \$3675.

This would also be a test for wrapping other cars off storage, such as the Silver Lodge and Sunburst Rose. Company has stated they will also give us a discount on future car wraps if we do this one.

NOTE: As this is under the Zephyr Project, it is exempted from the moratorium enacted at the last meeting.

REQUESTED ACTION: Approval expenditure for \$4000 to wrap “Silver Hostel” for outside storage. Expenditure to come from line item 56490 – Zephyr Project.
