

Archives Report, June 2014
Frank Brehm, Archivist

This is an informational report at this time and no action is requested at this time. Any input the directors may have would be appreciated. I can be contacted through email.

As we all know storage for the archives is at a premium. I have found storage shelving units made for archival storage such as we need. I have made drawings of the Simplot car with 3 different ideas for layout of the car using these shelving units. As I have previously reported the Simplot car is a perfect storage car for archives such as ours due to the type of car it is.

By using the Simplot car as a storage car I am hopeful the current car used for archives storage can be repurposed as a combination office and research/library area. Pricing for each plan is included with and without boxes. All pricing is less tax and freight charges. Additional costs will include a metal mesh material that can be bolted to the rear of the shelving units to act as a "rear wall" for those that need it and material that can be used to secure the boxes on the shelves and secure the shelving units in the car in case of car movement.

Drawing 1

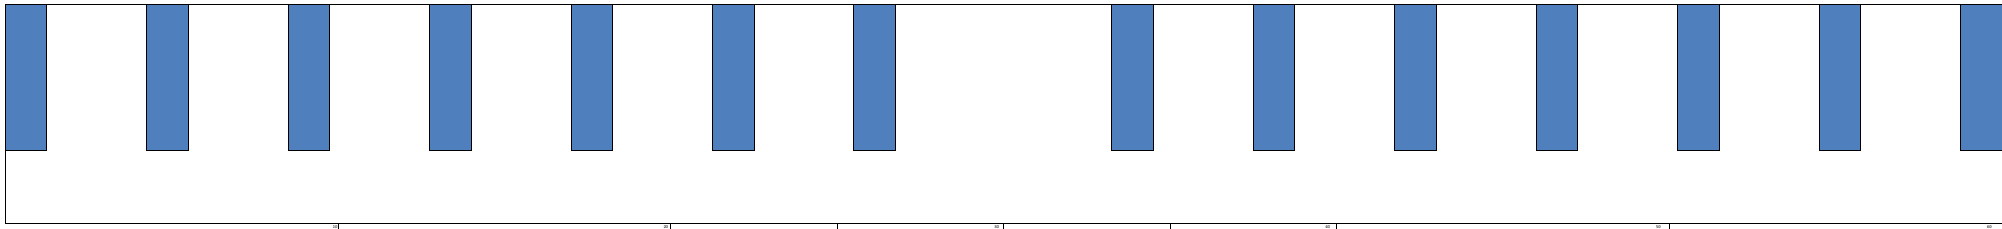

All shelving units are 8' high by 6' long.
Aisleway is approx. 3' wide.
Storage room for 490 office boxes.
Pricing \$5290.74 with boxes, \$4369.05 without boxes.

Drawing 2

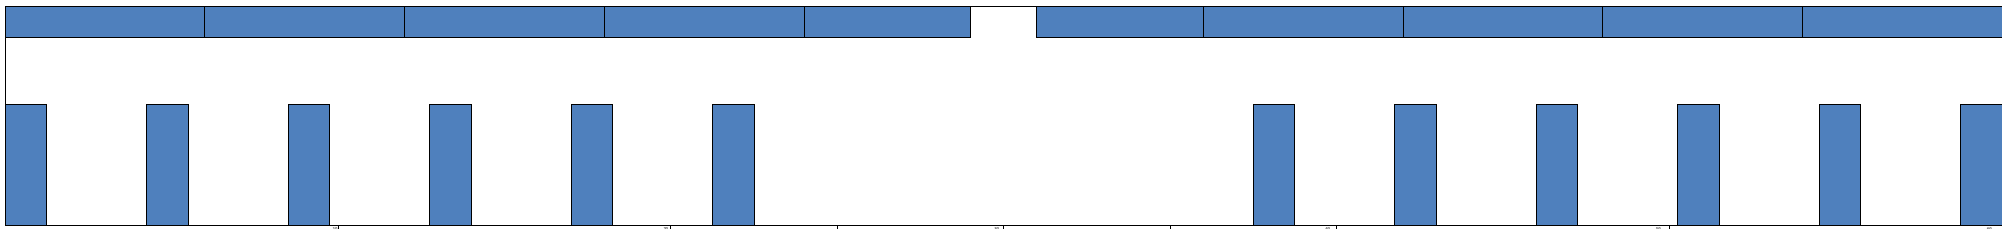

All shelving units are 8' high. 14 units are 5' long, 8 units are 6' long.
Aisleway is approx. 2'-9" wide.
Storage area for 672 office boxes.
Pricing \$7356.42 with boxes, \$6099.57 without boxes.

Drawing 3

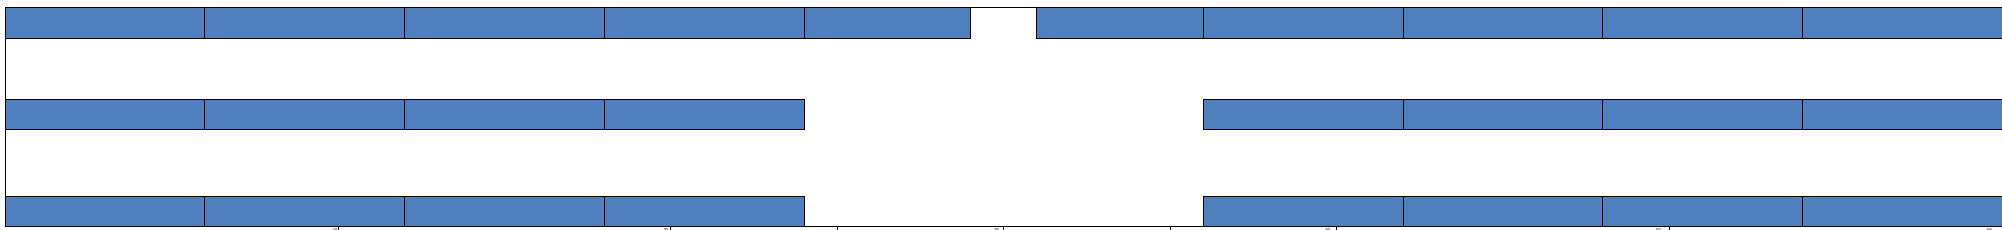

All shelving units are 8' high. 2 units are 5' long, 24 units are 6' long.
Aisleways are approx. 2'-6" and 2'-9" wide.
Storage area for 896 office boxes.
Pricing \$9688.86 with boxes, \$8004.51 without boxes.
