CAPITAL PROJECT FUNDING

On Friday, July 12, there will be a meeting of community and governmental representatives, along with FRRS officers, to discuss funding pathways and opportunities for various capital projects such as the Whitman Multipurpose Building and the Old Town Portola Extension.

Representatives of a solar power company will also be present to discuss some unique funding opportunities concerning solar power installation at the museum.

I will have a further report at the Board Meeting.

2019 WP-PCR CONVENTION

I am working with Jim Collins, who is also an FRRS member, and the PCR team on plans for the 2019 joint convention in Sacramento. We have promotional material that will be rolling out in the coming week and registration will be opening very soon. The name of the convention is Diamond Rails Forever, celebrating the diamond anniversary of PCR. It is also the 70th anniversary of the inauguration of the *California Zephyr*, which will be the theme for the FRRS / WP portion of the event.
