

08/07/2018

Mechanical report from the desk of Bil Jackson:

SP1100: New seats and seat backs were installed 08/02 2018.

UP2873: A new fireman seat and arm rests are planned to be completed this month.

SP Caboose: Plans are in the works to repair the torn seats before the end of the year.

The parts for the Ford pickup steering column have been ordered and partially installed. This project should be completed by the end of this week.

I will be going around all the cabooses with tools and tightening up all screws and bolts that have rattled loose since last year.

Assistant CMO David Elems should be able to provide a complete report as to removal of radiators to be installed into the WP917. That's all I have for now.

Bil Jackson
