

11/4/2018

Last month I was able to start the Dodge Pick Up by installing a new fuel and air filter. I believe eather the gauge is wrong and it was very low on fuel/

I revisited the Ford Pick Up and found the starter switch on the steering column had come apart. It was repaired and starts fine now.

Duane V/ and I overhauled the steering ram on the Yale yellow fork lift and it now steers as designed.

That;s all that I accomplished last month. Bil
