PAINTING WESTERN PACIFIC GP7 705

Proposing that the next big paint job we tackle be the WP 705. There are some questions we need to settle and we need to define a budget.

It has been agreed upon that the 705 will get green paint with the WP on the nose, since that is all it ever had as a green unit. I would like to move forward with prepping it as soon as I finish painting the SN bay window in primer. Hopefully the new paint will spur the funds to come in to work on the mechanical needs.

Questions:

- What quality of paint?
- Replace all the windows that are broken or missing?

REQUESTED ACTION: Approve painting plan and budget.
