

Tree Trimming and Front Gate Facilities Report  
12/11/2021 E. Doty

On a side note before we get to the actual report, with the snow storm coming up I wanted to make clear the conditions under which I will plow out the museum. Monday-Friday only, first sunny day after a storm when I am available. Meaning if the storm lasts Monday-Friday, it won't get cleaned up by me till the following Monday. \$20 an hour in wages will get you snowplowing during a storm, Monday-Friday only, by decree of the wife.

**Front Gate**

The Tuesday before Thanksgiving it was reported that a hole had been dug (again...) underneath the north gate half over the tracks at the front entrance. So Steve and I fixed that. Most of those concrete blocks there should be rather difficult for kids to remove.

This is when we were done.

## Tree Trimming

I got the spot down by the City Yard that I was working on finished up. All debris is now with the rest of the parking lot pile. First the before photos as a reminder, the after action photos following.
